

## Mini Maggie Three Piece *Desk Top* System \$1500

Mini Maggie Satellite Speakers: 14h, 9.5w, 1.25d

Photo Credit: Magnapan

Mini Maggie Woofer: 22.5h, 19.5w, 1.25d

Magnepan's MG 3.7 (\$5500pr) is quite the rage in high end loudspeakers these days. They are winning raves from all corners as among the finest speakers available at ANY price.

Magnepan wanted to bring the success of the MG 3.7 down to size. Specifically, they wanted to make a version that would work for those of us who spend a fair amount of time at our computer.

The three piece system features two satellite speakers and a woofer. The satellites use Magnepan's Quasi ribbon mid-woofer and TRUE ribbon tweeter. The woofer is a Quasi design.

If you spend quality time at your computer and want the kind of revealing detail only Magnepan can provide- the Mini Maggie System is for you! The woofer provides cohesive extension for satellites. It isn't a floor thumper!

This is not intended to be a 3 piece system to fill up a listening room. It is specifically designed to be a NEAR FIELD system. Spoil yourself while you work (or play) at your computer!

Side trim is available in oak, cherry or black.
