

FLOATING BERLIN

Salamander makes several very nice lines of AV gear.

The Chameleon line is high furniture grade quality without visible nuts and bolts and comes mostly assembled.

Berlin is one of the options within the Chameleon line.
New from Salamander is the FLOATING BERLIN.

You can see from the photo that the effect is extremely clean and classy!
The photo features the Berlin Quad 247, \$2300, mounted on the wall.

Our most popular model is the Berlin Twin 221, \$1300.

You can mount it yourself, or hire us on a T&M basis.

We have it on display in the store. It looks even better in person!

The Archetype is open style with continually adjustable shelving.
This is the Archetype 5, \$500, not assembled.

The Synergy line is modular which allows you to create a wide array of options.
The base unit runs \$906- not assembled.
