

GoldenEar Aon 2 \$800pr (12h, 8w, 10d)

Now in stock!

The Aon 2 is GoldenEar's little brother to the highly touted Aon 3 (\$1000pr, 14h, 9w, 11d).

Aon 2 will make sense when you need a smaller speaker than Aon 3.
Or, consider Aon 2 if you're running a sub anyway and aren't a terribly loud listener.

Aon 2 uses a 6" cast, mid-woof. Aon 2 has two 6.5" side firing Infrasonic Radiators.
Aon 3 uses a 7" cast, mid-woof. Aon 3 has two 8" side firing Infrasonic Radiators.

They both use the same, industry acclaimed ribbon tweeter.
