BRYSTON

MEMO

DECEMBER 2023

Hi James,

We wanted to share with you some information on our newest Bryston addition. We just got done setting up our new Model T-10s, and right out of the boxes, with minimal setup, they simply sound awesome.

The only thing we can say is, hats off to you and the team. It's all there and then some. We paired them with all new 2023 purchased BDA3, the brand new BP19 (which deserves its own praise), and the almighty 14B3.

The fit and finish is fantastic on these speakers. They have crazy-powerful and articulate room filling bass! (our room is 1000+ square feet). Their midrange is rich and tonality correct with spot-on imaging and they have non-fatiguing, ultra-clean, and precise highs. They are the best off-axis performing speakers we have heard to this day. The power handling capabilities of these T-10s is astonishing to say the least! We are sure that our distant neighbours could agree! LOL.

Again, thank you so much to everybody involved, Bryston rocks!
