STEVE'S VISIT & THE T-10

Over the Holidays I had the pleasure of visiting James & getting a demo of the new Bryston T-10 speakers.

The new T-10s are as far from a book shelf as you can get standing 6' plus with a distinctive two tone look that is a refined evolution over the previous Middle T-Rex's.

I was suitably impressed just as I was with the previous Middle T-Rex speakers both being the active versions.

The sound stage of the T10s speakers driven by a pair 21B3s fed by their spectacular BR-20 sitting behind a BIT-20 has to be experienced to be appreciated.

As James says... "The demo is everything"

The T-10s envelope the listener with imaging & clarity that leaves the listener wondering if they are in the room with the artist. From the nuance of the singers breath to the bass impact of the drums they effortlessly reproduce what is put to them.

Home Theatre and 'Immersive' audio is a passion of mine and the Bryston T-10s manage to do what generally requires multiple surround speakers to accomplish.

Do yourself a favor and make a New Year's resolution to put some Bryston in your home.
