ANNOUNCING THE BRYSTON Bi-200

Bryston integrated amplifiers give no ground to their separate counterparts.

The new Bi-200 is literally constructed from the Bryston BP-19 Preamplifier and 3B Cubed power amplifier into a single chassis offering the best of both products without occupying extra space and costly interconnects.

High performance and transparency is always our goal, and an integrated amplifier doesn't have to compromise ability for convenience.

Build your ultimate dream system with our separates or keep your stereo compact and discrete with our Bi-200 Integrated Amplifier.

WELCOME TO THE NEXT LEVEL
